

MOHAMAD ZIKRI BIN ZAIDI

IT Engineer | Cloud & Security | AWS | Python | Flask | CI/CD
+65 88836443 | md_zikri@hotmail.com | github.com/zeekvy | https://d3o085ena3cy6h.cloudfront.net

PROFESSIONAL SUMMARY

IT Engineer with hands-on experience across system support, AWS infrastructure, and secure application development. Built and deployed production-grade projects including a live honeypot on EC2, a CI/CD pipeline via GitHub Actions, and a secure web app with 2FA, CSRF protection, and audit logging. Completing a BSc (Hons) in Cyber Security at Coventry University. Looking to bring both operational IT experience and a security-first development mindset to a cloud or security engineering role.

PROJECTS

Cloud Honeypot with Attack Dashboard | github.com/zeekvy/cloud-honeypot

Python | Flask | MySQL | Docker | Nginx | AWS EC2 | Linux

2026

- Built a simulated vulnerable web server to capture and log real attack attempts from the internet
- Implemented automatic detection of brute force attempts, admin probes, and suspicious path scanning
- Enriched attacker data with GeoIP country lookup using MaxMind GeoLite2
- Containerized the full stack (Flask, MySQL, Nginx) with Docker and deployed live on AWS EC2

Secure Notes Web App | github.com/zeekvy/securenotes-flask

Python | Flask | MySQL | CSRF Protection | OTP 2FA | Audit Logging

2026

- Built a web application with user authentication, session management, and encrypted note storage
- Implemented OTP-based two-factor authentication (2FA) and bcrypt password hashing
- Applied CSRF token protection and automatic session timeout to prevent common web attack methods
- Designed an audit log system to track user activity, supporting compliance and any forensic review

Cloud Resume & CI/CD Pipeline | github.com/zeekvy/Cloud_Resume

2026

AWS S3 | GitHub Actions | HTML | CSS | Git

- Deployed a static resume website on AWS S3 with public hosting
- Built a fully automated CI/CD pipeline using GitHub Actions; changes pushed to main branch deploy instantly
- Managed version control, asset organisation, and deployment configuration entirely through Git
- Applied DevOps best practices end-to-end: source control, automated builds, and cloud deployment in a single pipeline

WORK EXPERIENCE

IT Deskside Engineer | Alphaeus Pte Ltd (Kyndryl)

July 2025 - Present

- Sole on-site IT support for a polyclinic. Independently managed all hardware, software, and network issues
- Supported 50+ users across Microsoft 365 apps, resolving at least 20 issues per day under SLA pressure
- Administered user accounts, access permissions, and password policies through Active Directory
- Diagnosed network faults using IP configuration, connectivity analysis, and ping/traceroute tools
- Performed full device lifecycle management, such as imaging, configuration, deployment, and decommission
- Configuring and maintaining network and label printers across clinical departments

Auxiliary Police Officer | AETOS Holdings Pte Ltd

Oct 2022 - July 2025

- Responded to security incidents and anomalies, demonstrating situational awareness and calm under pressure
- Maintained detailed incident logs and shift handover documentation

Game Design Intern | Binus University Indonesia

Sep 2018 - Mar 2019

- Developed game features using Unity and scripting logic; debugged application errors through systematic testing
- Conducted user testing sessions, collected feedback, and iterated on application behaviour

SKILLS

Cloud: AWS EC2, S3, RDS, IAM, CloudWatch, Docker

Languages: Python, SQL, HTML, CSS, Bash (basic)

IT Operations: Windows OS, Microsoft 365, Active Directory,
Network diagnostics

Security: 2FA/OTP, CSRF, Password hashing, Audit logging

Framework & Tools: Flask, MySQL, Git, GitHub Actions, Linux,
Docker, Nginx

EDUCATION

BSc (Hons) Cybersecurity | [Coventry University](https://www.coventry.ac.uk) | All coursework completed

Expected Nov 2026

Diploma in Game Design | [Republic Polytechnic](https://www.republicpolytechnic.edu.sg)

Graduated on 09 May 2019

CERTIFICATIONS

Google AI Essentials: 13 Apr 2026

Claude Code in Action: 12 Apr 2026

AWS Cloud Practitioner: In Progress
